Student Information System Database

Project Proposal

Licayan, Jeff Kline M.

CPE262 H1-C1

Project Details

The Student Database set incorporates essential data including address, relatives, grades, guardians, and contact data. This data set is connected to all of the Student's school classes, exercises and activities. Including information regarding billing, accounts, and medical history that can be added by the administrators.

Project Duration

The Project duration can be estimated to a month to fully create a functional database.

Objectives

The Aim Objectives are the following:

-Fast and Efficient UI
-Easy to navigate
-User Friendly
-Clean Integration
